Abstract	viii

CHAPTER ONE: BACKGROUND OF THE STUDY

1. Introduction	1
2. Background of the research problem	1
3. Statement of the research problem	12
4. The study hypotheses	13
5. Aims of the study	13
6. Justification of the study	14
7. Entering the field	16
8. Outline of the dissertation	19
Notes and References	21

CHAPTER TWO: SURVEY OF THE LITERATURE

2.1 Introduction	24
2.2 Sexually Transmitted Diseases (STD) and HIV/AIDS	24
2.3 Gender, power and HIV/AIDS prevention	26
2.4 Limiting the number of sexual partners	29
2.5 Promotion of condom use	33
2.6 Voluntary Counseling and Testing for HIV/AIDS(VCT)	36
2.7 The Development of a National Policy on HIV/AIDS	37
2.8 Women and Development	41
2.8.1 Sexual Matters and Innocence	42
2.8.2 Gender Violence	43
2.9 AIDS and Development	45
Notes and References	47

CHAPTER THREE: RESEARCH METHODOLOGY

3.1 Introduction	49
3.2 Data used	49
3.3 Sample	51
3.4 The instrument(s)	52
Notes and References	54

CHAPTER FOUR: DISCUSSION OF FINDINGS

4.1 Introduction	55
4.2 Sexual attitudes and HIV/AIDS prevention strategies	55
4.3 Multiple Partners	59
4.4 Satisfaction of Partners	60
4.5 Sexual Practices and HIV/AIDS Prevention Strategies	63
4.6 Behaviour change to reduce HIV infection	66
4.7 Condom usage	69
4.8 The Cultural Practices and HIV/AIDS Prevention	73
4.9 Control and Prevention of STDs, the Gender Issues	80
Notes and References	84

CHAPTER FIVE: DISCUSSION, CONCLUSION AND RECOMMENDATIONS

5.1 Introduction	85
5.2 Discussion	85
5.2.1 Treatment and control of STDs	86
5.2.2 Reduction of sexual partners and sticking to one sexual partner	87
5.2.3 Promotion of condom use	88
5.2.4 Voluntary counseling and testing for HIV	90
5.3 Conclusion	91
5.4 Recommendations	93
5.5 Areas of Further Research	94
Notes and References	95
Bibliography	96

LIST OF TABLES	PAGE
Table 1: Distribution of respondents in the District	49
Table 2: Perceptions on whether a married woman can ask her husband to use condoms by age	55
Table 3: Perceptions on whether a married woman can ask her husband to use condoms by marital status and educational level	56
Table 4: Perceptions on whether a married woman can ask her husband to use condoms by occupation	58
Table 5: Men's preference on multiple partners, by marital status and education level	59
Table 6: Men's preference on multiple partners, by occupation	60
Table 7: Views on men's satisfaction by one partner by age	61
Table 8: Views on men's satisfaction by one partner by education level and marital status	62
Table 9: Views on men's satisfaction by one partner by occupation	62
Table 10: Perceptions of respondents to risk of getting HIV infection by age	64
Table 11: Perceptions of respondents to risk of getting HIV infection by marital status and education level	65
Table 12: Perceptions of respondents to risk of getting HIV infection by occupation	66

Table 13: Proportion reporting having changed behaviour to reduce HIV infection by age	66
Table 14: Proportion reporting having changed behaviour to reduce HIV infection by marital status and educational level	67
Table 15: Proportion reporting having changed behaviour to reduce HIV infection by occupation	68
Table 16: Respondents who have ever used condoms by age	69
Table 17: Respondents who have ever used condoms by marital status and educational level	70
Table 18: Respondents who have ever used condoms by occupation	72
Table 19: Partner with most influence to resume sex after birth by age	73

DECLARATION

I declare that "**GENDER PERCEPTUAL DIFFERENCES AND THEIR EFFECTS ON THE IMPLEMENTATION OF POLICY IN THE PREVENTION OF HIV/AIDS IN MAKONI DISTRICT, ZIMBABWE**" is the author's original work and has never been submitted by the author or anyone else at any university for a degree. All the sources that I have used or quoted have been indicated and acknowledged by means of complete references.

TRUE SHAME MUSABAEKA
DECEMBER 2006

ACKNOWLEDGEMENTS

I have worked on this dissertation at a pace, which has varied from the intense to the intolerable. As a consequence I asked and received a great deal of my supervisor, Professor S. Buthelezi his marvelous helping hand and encouragement which were stretched up to and sometimes beyond the limits have seen me sailing through in the process of moulding this dissertation.

My work owes much to Family AIDS Caring Trust (FACT) members, Rusape Branch, particularly Mr. F. Mugoti where the stimulating and convivial combination of critical enquiry, friendship and debate has been a major feature during the fieldwork especially in the rural areas.

I am also grateful to my colleagues and fellow students for their countless support when I needed it most.

Last but not least, I thank the good Lord for making my plans come true for He is the only one who knows our future.

DEDICATION

This dissertation is dedicated to my family members for the support and value they have always given to my life as a whole.
